TMF Systems

Research to delivery
Premium business software, workflows and workspaces
Pilot briefing | Proposed service specification

Six priority service families

Systems assessment
Workflow integration
Customer service
Revenue operations
Ecommerce operations
Payroll operations

What makes a deliverable professional

Explicit scope and ownership
Source-linked requirements
Failure and recovery paths
Real acceptance evidence
Support and exit arrangements

Research before implementation

Research lead coordinates bounded investigation
Web, documents and REA supply evidence
Review checks support, conflicts and gaps
One record feeds report, workbook and briefing

Evidence and decisions still needed

Client, jurisdiction and operating volumes
Provider access and authoritative records
Costs, support coverage and specialist review
No offer is declared client-accepted here

Source and next step

Source: https://github.com/acratt13/tmf-research/blob/47b77af/docs/SERVICE-SPEC.md
Next: select one client problem and verify its complete workflow
Proposed architecture and scope; not production proof
